1. Overview

GH+ (Government Hospital Plus) is a web-based medical records and hospital administration system designed for patients, doctors, and administrators. It allows users to:

- Register accounts for access
- View and manage personal medical records
- Upload medical documents and prescriptions
- Approve or manage staff and patient accounts
- Review support requests and system activity

The system is intended for use through a web browser on a local XAMPP server.

Figure 1: System Architecture Overview — GH+ on XAMPP Stack

2. System Requirements

Before using GH+, make sure the following are available:

- XAMPP with Apache, MySQL, and PHP installed
- PHP extensions: mysqli
- A working browser such as Chrome, Edge, or Firefox

Recommended Setup

1. Start Apache and MySQL in XAMPP.
2. Import the database from gh_plus.sql.
3. Open the application in your browser at: http://localhost/gh_plus/

3. First-Time Setup

Step 1: Import the Database

4. Open phpMyAdmin at <http://localhost/phpmyadmin>.
5. Create or select the database named gh_plus.
6. Import the file gh_plus.sql.

Step 2: Configure Database Access

Open includes/config.php and confirm the database settings:

- DB_HOST = localhost
- DB_USER = root
- DB_PASS = empty (for default XAMPP setup)
- DB_NAME = gh_plus

Step 3: Ensure Uploads Folder Is Writable

The uploads folder stores patient photos, medical documents, and uploaded files.

Step 4: Add Logo and Default Image

Place your logo image as: assets/logo.png

Place a default avatar image as: assets/default.png

4. Login and Account Access

Login Page

The main login screen is available at: http://localhost/gh_plus/

Use your NIC number and password to log in.

Figure 2: Login Page

Default Accounts

The system includes demo accounts after importing the SQL file.

Role / Account	NIC Number	Password
Admin	000000000V	Admin@1234

Role / Account	NIC Number	Password
Patient 1	000000000001	000000000001

Role / Account	NIC Number	Password
Doctor 1	000000000005	000000000005

Important: Change the default admin password immediately after the first login.

5. Patient User Guide

Patients use GH+ to view their medical history, prescriptions, uploaded documents, and personal profile.

5.1 Register as a Patient

7. Open the login page.
8. Click Sign Up.
9. Choose I am a Patient.
10. Fill in your personal details: full name, NIC number, date of birth, gender, city, blood type, email and phone, medical conditions and notes.
11. Create a password.
12. Submit the form.

The screenshot shows the 'Choose Account Type' registration page for GH+ (Government Hospital Plus). The page features a dark header with the GH+ logo and the text 'Government Hospital Plus'. A link for 'Back to Login' is located in the top right corner. The main content area is titled 'Choose Account Type' and includes the instruction 'Select the type of account you want to create'. There are two options presented as cards: 'I am a Patient' (with a doctor icon) and 'I am Medical Staff' (with a medical staff icon). The 'I am Medical Staff' option is highlighted with a red border. Below each option is a brief description of what the user can do after registration.

Account Type	Description
I am a Patient	Register to access your personal medical records and history
I am Medical Staff	Register as a doctor, nurse, or other medical professional

[Submit for Approval](#)

Figure 4: Patient Registration Form

Your account will be marked as pending until an administrator approves it.

5.2 Login as a Patient

After approval:

13. Open the login page.
14. Enter your NIC and password.
15. Click Login.

You will be redirected to the patient dashboard.

5.3 Patient Dashboard

The dashboard shows:

- Your personal information
- Your recent visits
- Total prescriptions
- Uploaded documents
- Account status

Figure 5: Patient Dashboard

5.4 View Medical History

Use the Medical History section to review:

- Visit dates
- Doctors who treated you
- Diagnosis details
- Prescriptions
- Attached documents

Figure 6: Medical History Timeline

5.5 View Prescriptions

The Prescriptions page shows prescription records that were issued to you by doctors.

Figure 7: Medical Record Detail View

5.6 View Documents

The Documents page lists uploaded reports, images, audio, or video files connected to your medical records.

Full records can also be downloaded as a formatted PDF document directly from the browser.

Figure 8: Medical Record PDF Output

5.7 Update Profile Information

From Profile Settings, you can:

- Change your profile photo
- Update contact details such as email, phone, and city
- Change your password

5.8 Contact Support

The Contact Us page allows you to:

- Send a support message
- View frequently asked questions
- Find hospital contacts and emergency helpline information

5.9 Important Patient Notes

- Name, NIC, date of birth, and other identity details cannot be changed directly from the patient profile.
- Changes to these fields must be handled by an administrator.
- Uploaded files are visible to authorized staff and admins.

6. Doctor User Guide

Doctors use GH+ to search for patients, review their history, and add new medical records.

Medical staff accounts are created the same way as patient accounts: through Sign Up, by choosing I am Medical Staff, and completing a registration form with professional details. New staff accounts also require admin approval before they become active.

Medical Staff Registration

Figure 9: Medical Staff Registration Form

6.1 Login as a Doctor

16. Open the main login page.
17. Enter your doctor account NIC and password.
18. Login.

You will be redirected to the doctor search screen.

6.2 Search Patients

Use the Search Patients page to find a patient by:

- Name
- NIC
- City
- Blood type

PHOTO	PATIENT NAME	NIC	CITY	BLOOD TYPE	CONDITIONS	LAST VISIT
	Samritha	000000000001	Negombo	A-	Diabetes,Hypertension,Heart Di	No visits

Figure 10: Doctor — Search Patients

6.3 View a Patient Profile

When you open a patient profile, you can review:

- Patient personal details
- Blood type
- Known conditions
- Allergies and notes
- Previous medical records

6.4 Add a New Medical Record

From a patient profile, click Add New Record and fill in:

- Visit date
- Diagnosis
- Prescription
- Notes for the patient
- Attachments such as images, PDFs, audio, or video files

After saving, the record becomes visible to the patient and authorized staff.

Add New Medical Record — patient1

VISIT DATE * 06/19/2026 DOCTOR dr1

DIAGNOSIS *
Clinical diagnosis and findings...

PRESCRIPTION
Medicine name, dosage, frequency, duration...

NOTES FOR PATIENT
Follow-up instructions, advice, dietary notes...

ATTACH FILES (IMAGES, PDFS, AUDIO, VIDEO)
Choose Files No file chosen

Accepted: JPG, PNG, PDF, MP3, MP4. Max per file: 20MB.

Cancel Save Record

Figure 11: Upload New Medical Record

6.5 View Record Details

Use View Details to open a full record and review attached files.

6.6 Update Doctor Profile

In Profile, doctors can:

- Change profile photo
- Update password

6.7 Doctor Notes

- Only authorized medical staff can create records.
- The system records actions for audit and review.
- File uploads are restricted to allowed formats.

7. Administrator User Guide

Administrators manage users, approve registrations, monitor reports, and oversee support requests.

7.1 Login as an Admin

Use the admin login credentials provided above.

7.2 Admin Dashboard

The dashboard displays:

- Active patients
- Active medical staff
- Total medical records
- Pending approvals
- Recent registrations

Figure 12: Admin Dashboard

7.3 Approve or Reject User Requests

From Pending Approvals, the admin can:

- Approve patient and staff registration requests
- Reject requests when needed

New users stay pending until their request is approved.

Figure 13: Pending Approvals — Patient and Staff Requests

7.4 Manage Patients

From Manage Patients, the admin can:

- Search patients
- Edit patient information
- Update account status
- Delete patient accounts

7.5 Manage Staff

From Manage Staff, the admin can:

- View medical staff members
- Edit staff details
- Change staff status
- Delete staff accounts

7.6 View Reports

The Reports page provides summary information such as:

- Active patient count
- Active staff count
- Pending approvals
- Blood group distribution
- Staff positions

7.7 Manage Support Messages

From Support Messages, the admin can review user support tickets and respond as needed.

Figure 14: Admin — Support Messages

7.8 Audit Log

The Audit page shows recorded actions such as logins, medical record updates, user changes, and system events.

7.9 Admin Profile

Admins can update their own profile and password from the profile section.

8. Common Features by Module

Dashboard

Each role has a dashboard that summarizes the most important information for that user.

Sidebar Navigation

The left sidebar contains links to the main pages for the current user role.

Search

Doctors can search patients quickly by name, NIC, city, or blood type.

Modals and Forms

The system uses modal windows for editing records or adding new information.

9. Supported File Types

The system allows the upload of common healthcare document formats, including:

Category	Supported Formats
Images	JPG, PNG, GIF
Documents	PDF
Audio	MP3, WAV
Video	MP4, AVI, MOV

Certain file size limits apply, and invalid files will be rejected.

10. Security and Privacy Notes

GH+ includes basic security controls such as:

- Password hashing
- Session-based login
- Role-based access
- Restricted upload folder permissions
- Activity logging

Users should protect their password and log out after each session.

Appendix A: Database Schema (Technical Reference)

For administrators and IT staff maintaining the system, the gh_plus MySQL database contains 7 related tables. The users table is the central entity: patient_details and staff_details extend it with role-specific data, medical_records links patients and doctors, medical_documents stores uploaded file metadata, and support_messages plus the audit log reference users for accountability.

Figure 15: Database Schema — gh_plus (7 Tables)

11. Troubleshooting

I Cannot Log In

- Check that your NIC and password are correct.
- Verify that your account has been approved.
- If your account is still pending, wait for admin activation.

My Registration Is Pending

- The admin must approve your account before you can log in.

I Cannot Upload Files

- Ensure the file type is supported.
- Check that the file size is within the allowed limit.
- Verify that the uploads folder is writable.

Forgot Password Does Not Work

- The current demo version does not send real reset emails.
- Contact the system administrator to reset your password manually.

12. Best Practices

- Change the default admin password immediately.
- Keep personal data accurate and up to date.
- Upload only relevant medical files.
- Log out after using the system on public or shared computers.
- Back up the database regularly.

13. Summary

GH+ is a simple but useful hospital record system that helps:

- Patients access their own medical information
- Doctors manage patient care efficiently
- Administrators supervise accounts and records

For daily use, the most important actions are login, registration, medical record viewing, record creation, and account approval.
